IN THE SPECIFICATION

Kindly amend the disclosure portion of the specification as follows:

Page 5, paragraph located at lines 5-14, please amend as follows:

With brief reference to FIGS. 5 and 6, it can be seen that the hinge body B preferably defines a U-shaped channel, typically defined by a stamping operation, having an inner wall \$\frac{\text{S1}}{\text{W1}}\$ and first and second sidewalls \$\frac{\text{S2,S3}}{\text{W2,W3}}\$, between which an open recess BR is defined. The wall \$\frac{\text{S1}}{\text{W1}}\$ of body includes openings to allow the claw C and related components described below to pass therethrough as required for operation of the hinge assembly. The body B is preferably U-shaped for strength, ease of manufacture, and weight/material reduction.
